

BHOWANEE PLATFORM WALKTHROUGH SCRIPT

Smart India Hackathon 2026 Presentation • Team Nexus

TARGET DURATION: 3:30 –
3:45 MAX

WORD COUNT: 485 WORDS
(130 WPM)

FUNCTIONALITY-BY-
FUNCTIONALITY

Core Objective

Live functionality
demonstration of all 7 roles,
auth flows & dashboards.

Narration Rule

Zero UI/animation fluff.
Strictly 1 line per distinct
implemented feature.

Speaker Perspective

First-person plural ("we",
"our platform") in natural
English.

End-to-End Linkage

Land verification → pricing
→ pre-order/bids → cold
fleet → escrow.

1. System Capabilities Inventory (All Implemented Features)

Role / Portal	Implemented Tools, Actions, Reports & Verified Features
Authentication index.html, auth.js	Instant regional language toggle (English, Marathi, Hindi); 10-digit mobile + 6-digit SMS / Voice IVR OTP (Farmer & Block Admin); Commercial Email + Password + SMS OTP (Buyer, Logistics, Storage, Investor); Staff work email + Authenticator MFA (Super Admin).
Farmer Portal farmer.html	Sell Tab: APMC Mandi benchmark price comparison (₹1,880), numeric ask price stepper, market tolerance advice (+10% / -10%), "Set my price" listing action. Offers Tab: live SVG bid board, "Accept best offer" into escrow, "Wait for more". Field Tab: parcel-linked soil NPK, pH, moisture, and micro-climate forecast. Call Tab: one-click Block Admin IVR dialer and payment history ledger.
Block Administrator block.html	Cadastral GIS Map: Dindori Nashik revenue map, Satellite Aerial vs. Vector boundary toggle, Gat survey number search & quick chips (125, 124, 66), boundary distance measurement tool. Right Drawer: 7/12 Land Record (Satbara) inspection, field operation certification checklist (sowing, irrigation, harvest), input expense accounting, farmer directory.
Institutional Buyer buyer.html	Browse Lots: commodity & grade filtering with mandi benchmark comparisons. Quality Reports: certified laboratory test certificates (#QC-ON-118). Demand Planner: forward seasonal volume procurement registration. Live Bid Board: real-time auctions with automatic ask-matching lock. Delivery Tracker: 4-stage consignment tracking. Invoices & Escrow: pre-funded settlement balances & tax receipts.
Logistics Partner logistics.html	Vehicle Fleet: multi-truck registry, payload capacities in quintals, driver assignments. Route Allotment: waypoint sequencing engine grouping farm pickups into corridors (25th & 30th Sep routes) to eliminate empty miles. Farm Gate Pickups: collection schedules. Proof of Handoff: digital custody transfers with weighbridge receipt upload. Transit Loss Log: zero-loss transit audit.
Storage & Warehouse storage.html	My Facilities: live fill gauges, chamber climate telemetry (❄️ 2°C Optimal), humidity sensors. List Facility: warehouse onboarding form with 4-step Bhowanee physical audit workflow. Storage Orders: Electronic Warehouse Receipts (e-NWR) for inward produce. Holding Timeline: chamber batch rotation tracking. Rent Ledger: direct monthly escrow payouts (₹64,350).
Investor & Admin investor.html, admin.html	Investor: Direct Agricultural Production Plans evaluation, side-by-side comparison, portfolio IRR and commodity diversification tracking, auto-reinvest yield switch. Super Admin Control Room: statewide cadastral operations, farmland lease pipeline, aggregated demand vs. supply matrix, master SBI escrow ledger, dispute arbitration queue.

2. Master Walkthrough Script (Timestamped 3-Column Format)

Time	Screen & Presenter Actions	Spoken Voice-Over Script (Exact Narration)
0:00–0:25 25 Seconds	index.html (Sign-in) - Show landing screen with Bhowanee emblem and role list. - Click language buttons: मराठी, हिन्दी, then return to English. - Click Farmer; enter mobile 9822114455, click <i>Send code</i>, and show OTP input. - Point to role options to indicate credential and staff MFA modes.	“Welcome to Bhowanee, developed by Team Nexus for Smart India Hackathon 2026. Bhowanee is a unified agricultural commerce and fintech platform eliminating intermediary exploitation through verified farm procurement and automated escrow settlements. The platform supports English, Marathi, and Hindi, featuring role-based authentication with mobile OTP, credential logins, and staff multi-factor security.”
0:25–0:55 30 Seconds	farmer.html (Farmer Portal) Sell Tab: View lot metadata (<i>12 Qt Onion, Gat 118</i>) and Mandi price (₹1,880). - Click +10 stepper to set ₹2,100, trigger market tolerance advice, and click Set my price. Offers Tab: Open tab, inspect live SVG bid curve, hover on Accept best offer. Field Tab: Open tab, scroll through soil NPK, pH, and micro-climate data. Call Tab: Open tab, show Call block administrator and payment history.	“In the Farmer Portal, farmers manage produce valuation, buyer offers, and farm telemetry. The Sell tab displays verified lot specifications alongside live APMC Mandi benchmark rates. Farmers set ask prices using numeric steppers with dynamic market tolerance guidance. The Offers tab visualizes live buyer bids, enabling one-click acceptance into escrow. The Field tab streams soil NPK and micro-climate data, while the Call tab logs payment receipts.”
0:55–1:25 30 Seconds	block.html (Block Administrator) Block Map: Pan Leaflet cadastral map; toggle between Satellite Aerial and Cadastral Vector. - Click quick chip Gat 125; click Measurement Tools on bottom bar. - Open right drawer for Gat 125; display 7/12 Land Record (Satbara). - Check off an agronomy task checkbox (<i>Irrigation / Sowing</i>). - Click Cost log in sidenav to display seasonal input expenditure.	“The Block Administrator dashboard provides hyper-local land verification and agronomic governance. Administrators navigate interactive cadastral maps, switching between satellite aerial and vector boundaries. Search tools and quick chips pinpoint individual Gat survey numbers to measure parcel distances. Selecting a parcel reveals verified 7/12 land records detailing ownership, soil type, and crop stages. Admins certify agronomy checklists—from sowing to harvest—and audit seasonal input expenses.”

Time	Screen & Presenter Actions	Spoken Voice-Over Script (Exact Narration)
1:25–2:00 35 Seconds	buyer.html (Institutional Buyer) Browse Lots: Filter commodity <i>Onion</i> and grade <i>Grade A</i>; check Mandi benchmark. Quality Reports: Open tab; view certified Lab Sheet <i>#QC-ON-118</i>. Demand Planner: Open tab; show projected quota form (<i>250 Qt, dock slot</i>). Live Bid Board: Step bid to ₹2,100, trigger auto-close alert, click Place Verified Bid. Delivery & Invoices: Check 4-stage delivery tracker; view settled escrow invoices.	“The Institutional Buyer portal streamlines commercial procurement, bidding, and contract fulfillment. Browse Lots filters verified produce by commodity and grade against market price benchmarks. Quality Reports provide certified laboratory test sheets detailing moisture, size uniformity, and pesticide compliance. The Demand Planner registers forward procurement quotas, aligning farm sowing with corporate demand. The Live Bid Board facilitates real-time auctions that auto-close when bids match farmer ask prices. The Delivery Tracker and Escrow Ledger monitor milestones and automated dock disbursements.”
2:00–2:30 30 Seconds	logistics.html (Logistics Partner) Vehicle Fleet: Scroll table showing 4 registered trucks, capacities (<i>118 Qt</i>), and driver assignments. Route Allotment: Open tab; highlight Vehicle 1 timeline (<i>25th Sep & 30th Sep pickups</i>) and green Route Optimization badge. Farm Gate Pickups: Open tab; view scheduled collection window table. Proof of Handoff: Show digital custody transfer form with weighbridge slip upload. Transit Loss Log: View zero-loss transit record.	“The Logistics Partner portal coordinates rural transport, scheduled collections, and custody verification. Vehicle Fleet registers transport trucks, payload capacities in quintals, and driver assignments. The Route Allotment engine sequences multi-farm waypoints into optimized collection corridors, preventing deadhead mileage. Farm Gate Pickups coordinates field collection windows and active transit volumes. The Proof of Handoff tool validates custody transfers through weighbridge receipts and photo verification. A transit loss log audits zero-loss delivery compliance.”
2:30–2:55 25 Seconds	storage.html (Storage & Warehouse) My Facilities: View facility card with live chamber temperature (❄️ <i>2°C Optimal</i>) and capacity fill gauges. List Facility: Open tab; show facility specification inputs and 4-step Bhowanee audit stepper. Storage Orders: Open tab; view electronic warehouse receipts (<i>e-NWR</i>) and batch volumes. Holding Timeline & Ledger: View batch rotation and automated rental settlement (<i>₹64,350 via SBI Escrow</i>).	“The Storage and Warehouse portal manages crop preservation and collateralized inventory. Facilities displays live storage fill gauges, temperature telemetry, and humidity sensors. Warehouse operators list new facilities and request physical on-site verification from Bhowanee field auditors. The Storage Orders tab issues electronic warehouse receipts for inward crop batches. Operators track chamber rotation timelines and receive monthly rental disbursements directly through escrow.”

Time	Screen & Presenter Actions	Spoken Voice-Over Script (Exact Narration)
2:55–3:20 25 Seconds	investor.html & admin.html 1. investor.html: Open Plans, sort by IRR; click Compare Selected to show side-by-side specs. 2. My Investments: Show commodity diversification bar and auto-reinvest toggle. 3. admin.html: Show statewide cadastral map and Farmland Leases pipeline. 4. Control Room: Click Settlement Ledger and Dispute Queue in sidenav.	“The Investor and Administrator dashboards deliver capital deployment analytics and statewide governance. The Investor portal compares agricultural production plans funding verified farm seasons against pre-sold demand. Investors monitor portfolio IRR, crop diversification, and automated dividend payouts. In the Super Admin Control Room, administrators oversee statewide operations, tracking active land leases and district crop health. Platform staff audit master escrow balances, track contract velocity, and resolve dispute tickets.”
3:20–3:45 25 Seconds	index.html (Closing Summary) 1. Return to main ecosystem context. 2. Hold view on Bhowanee emblem and mission statement.	“Bhowanee connects these roles into an unbroken, transparent loop: Field sowing is verified on cadastral maps; farmers price their harvest autonomously; buyers secure volumes through forward plans or spot auctions; logistics and cold storage preserve produce quality; and verified dock weighments trigger automated, direct escrow payments to farmers. By replacing fragmented middlemen with verifiable data and escrow security, Bhowanee empowers Indian agriculture from field to fork. Thank you.”

3. Ordered Recording Checklist (Capture Guide)

Phase 1: Authentication & Farm Production

- ☐ **Sign-in (index.html):** Test language toggle (EN → MR → HI → EN).
- ☐ **Sign-in (index.html):** Select Farmer role, 9822114455, show enter mobile OTP.
- ☐ **Farmer (farmer.html):** Sell tab → view Mandi ₹1,880 → step to ₹2,100 → Set price.
- ☐ **Farmer (farmer.html):** Offers tab → point to bid SVG → hover Accept best offer.
- ☐ **Farmer (farmer.html):** Field tab → scroll soil NPK & micro-climate cards.
- ☐ **Farmer (farmer.html):** Call tab → point to Call Admin button & payment list.
- ☐ **Block Admin (block.html):** Map → toggle Satellite Aerial to Vector mode.
- ☐ **Block Admin (block.html):** Click Gat 125 chip → open 7/12 Land Record drawer.
- ☐ **Block Admin (block.html):** Check an agronomy task box → open Cost log tab.

Phase 2: Market, Supply Chain & Governance

- ☐ **Buyer (buyer.html):** Browse Lots → filter Onion & Grade A.
- ☐ **Buyer (buyer.html):** Quality Reports → show Lab Test Certificate #QC-ON-118.
- ☐ **Buyer (buyer.html):** Demand Planner → show volume registration form.
- ☐ **Buyer (buyer.html):** Live Bid Board → step bid to ₹2,100 → show auto-close notice.
- ☐ **Buyer (buyer.html):** Delivery Tracker → show 4 milestones → view Invoices.
- ☐ **Logistics (logistics.html):** Fleet → Route Allotment (Vehicle 1 timeline & opt badge).
- ☐ **Logistics (logistics.html):** Pickups → Proof of Handoff weighbridge slip upload.
- ☐ **Storage (storage.html):** Facilities (❄️ 2°C telemetry) → Orders (e-NWR) → Rent Ledger.
- ☐ **Investor (investor.html):** Plans (IRR sort) → Compare → Portfolio diversification.
- ☐ **Admin (admin.html):** State cadastral map → Farmland leases → Settlement ledger.
